

**Position Available: Maintenance Technician, Gulfstream V, IV (Van Nuys, CA)**

**Experience Desired:**

- Corporate Jets LLC is looking for a motivated and capable maintenance technician that can perform required maintenance on the Gulfstream V, IV aircraft. 5 plus years experience maintaining Gulfstream V, IV aircraft in Part 135 operation. Factory training on aircraft is required.

**Job Description:**

- Reports to the Director of Maintenance
- Responsible for the tracking, scheduling, and completion of the maintenance requirements for the Gulfstream V, and Gulfstream IV. Must be capable of performing in house maintenance on aircraft
- Must be capable of working various shifts to accommodate aircraft schedule
- Will make sure all maintenance performed on the aircraft conforms to the standards set forth in the Corporate Jets LLC manual requirements, FAA Regulations, and best industry practices
- Ensure timely scheduling of maintenance in order to ensure effective fleet availability and reliability
- Required to interface with flight crews to determine the discrepancy status of the aircraft
- Will perform day to day maintenance, troubleshooting, parts ordering and discrepancy corrective action. Responsible for understanding Minimum Equipment Lists and RVSM manuals.
- Update aircraft status forms and documents required by GMM.
- Ensure tracking systems are brought up to date following the completion of maintenance.
- Will maintain all technical data and logs necessary to ensure compliance with Maintenance Standard as well as FAA Regulations.

**Degree(s), Certification, Professional Training or Skills Required:**

- Airframe and Powerplant Certificates (A&P)
- Gulfstream V, or Gulfstream IV factory training
- Thorough knowledge of maintenance planning, oversight processes and practices.
- Knowledge and experience utilizing work order software and maintenance tracking software.
- Working knowledge of FAA Regulations and industry best practices.
- Know and understand Part 135 Inspection/Maintenance Programs.
- Have an understanding of the warranty requirements of the base aircraft.
