

**Position: Chief Inspector, Requisition # 11660**

**Location: Van Nuys, California**

*Aviall is a leading solutions provider of aftermarket supply-chain management services for the aerospace and defense industries and is the largest subsidiary of The Boeing Company. Aviall has an entrepreneurial spirit and a can-do culture with the backing of one of the world's best companies, Boeing.*

The Chief Inspector (CI) performs quality control inspections, checks, and tests during the overhaul and repair of aircraft wheel and brake components. The CI also inspects materials, parts and products at different stages of production and records observations and may make recommendations for improving processes. The Chief Inspector issues final airworthiness release of products.

The CI is responsible for the Quality Assurance Department for the Repair Station.

The CI plans and / or leads the activities related to the inspection functions in a manner which meets FAA and company standards and methods as determined by the Repair Station manuals. The CI also outlines and implements training procedures of employees for the inspection and production operations including drawings, prints, schematics and quality assurance standards.

The CI assures compliance with regulatory requirements and maintains Repair Station manuals and employee training records.

The CI may lead and direct the work of others.

The CI completes special projects and other duties as assigned.

**Minimum Qualifications:**
