

FOR IMMEDIATE RELEASE

Employment Opportunity February 21, 2017

Turbine Aircraft Maintenance Technicians

Martin Aviation has been offering aircraft maintenance services to the greater Orange County (KSNA) area for over 90 years. As an FAA Certificated PART 145 Repair Station (**M8VR406N**) and Pilatus PC-12 Satellite Service Center, we have a broad area of expertise that allows us to work on a wide variety of aircraft. We are looking to add to the strength of our technical team by hiring full-time certified Aircraft Maintenance Technicians (A&P).

REQUIREMENTS:

- A&P Certificate: current and in good standing
- Current Driver's license
- Pre-employment drug and alcohol test and background check
- 3-5 years experience with mid-size corporate aircraft. Primarily Gulfstream and Falcon type aircraft
- Must have own tools

ESSENTIAL FUNCTIONS:

- Ability to communicate and understand work assignments
- Perform aircraft inspections, repairs, line maintenance, and AOG maintenance as needed
- Perform maintenance tasks in accordance with FAA regulations, company policies and manufacturer recommendations
- Ensure company equipment and facility are used properly and maintained in good working order
- Perform duties assigned by the Director of Maintenance
- Ensure that all documents and maintenance procedures are accurate and completed in accordance with company and government regulations

DESIRED QUALITIES:

- Self-motivated
- Team Oriented
- Accountable
- Factory or formal training a plus

Hourly rate to be based upon experience. Martin Aviation offers medical, dental and vision benefits in addition to 401(k). Paid sick leave and vacation. If you are interested in becoming an essential member of the Martin Aviation team, please email your resume and salary requirements in a PDF format to:

Ben Ingram

Vice President of Maintenance
