

StandardAero is one of the largest independent MRO and aviation service businesses in the world, providing comprehensive services to commercial, military, business aviation, helicopters and industrial operators. Over 300 years of collective experience brings customers unique knowledge and expertise in solving maintenance challenges.

The company has over 3,700 employees working out of facilities strategically located in the U.S., Canada, Europe, Asia and Australia and serving customers from over 80 different countries.

Electrician, A&P III (LAX)

Job Number: 0312-11

Electrician, A&P installs, checks, repairs, overhauls, and rewires complete electrical systems and components on a variety of aircraft. Performs functional and operational checkouts of electrical instruments and flight systems upon aircraft arrival and prior to aircraft departure. This work must be performed competently, expeditiously, and in a timely manner to ensure on-time delivery, customer satisfaction, and profitability. The Electrician, A&P is technically competent on assigned aircraft, and is expected to be able to accomplish the vast majority of his/her duties with minimal supervision. As customers are on site at the facilities, professional appearance and communication skills are required in order to create a positive and lasting professional relationship.

Responsibilities

- Installs and rewires complete electrical systems and components on a variety of TFE and TPE powered aircraft.
- Troubleshoots, repairs, and overhauls aircraft electrical systems and/or components.
- Performs functional and operational “checkouts” of electrical instruments and flight systems upon aircraft arrival and prior to departure.
- Maintains battery shop equipment and ensures that aircraft batteries are properly charged in a timely manner.
- Maintains test cell electrical systems and makes repairs as needed (e.g. repair test harnesses, etc.).
- Updates technical manuals to include the latest wiring manual revisions.
- Assists in installing various avionics systems on corporate aircraft.
- Documents all work accomplished (a.k.a. sign-off) in a clear, concise and accurate manner.
- Observes all safety, environmental and general housekeeping rules and policies.
- May perform other duties as required by the department.

Requirements

- Must have A&P license
- High school diploma or equivalent.
- Minimum five (5)+ years experience in Corporate Aviation
- Must be able to read and understand blueprints and wiring diagrams.
- Must perform electrical wiring functions.
- Must have worked with aircraft wiring systems.
- Able to walk long distances, bend, crawl, stretch, climb, and lift up to 75 pounds.
- Experience with Gulfstream (2/3/4/5), Dassault Falcon Aircraft, Bombardier Challenger, Global Express and Lear Jet Models.

To Apply

Please send us a copy of your resume, along with a cover letter stating the position you are interested. To apply for this position, the subject line of your email must indicate “Job Title: Electrician, A&P III (LAX) (Job #: 0312-11)”.
