

## **A&P MECHANICS**

StandardAero is one of the largest independent MRO and aviation service businesses in the world, providing comprehensive services to commercial, military, business aviation, helicopters and industrial operators. Over 300 years of collective experience brings customers unique knowledge and expertise in solving maintenance challenges.

The company has over 3,700 employees working out of facilities strategically located in the U.S., Canada, Europe, Asia and Australia and serving customers from over 80 different countries.

StandardAero is seeking A&P Mechanics at our LAX facility. These individuals will perform routine maintenance, and major inspections on turbofan and turboprop powered aircraft. Trouble-shooting, repair, and modification of aircraft components, in addition to engine removal and reinstallation, operational checks, leak checks, and engine runs.

### **RESPONSIBILITIES**

Using sound judgment and technical aptitude to make decisions regarding maintenance, sequence, and techniques, troubleshooting and discrepancy resolution.

Removes and reinstalls engines from turbofan and turbo powered aircraft.

Performs operation checks and engine runs to ensure air-worthiness prior to departure.

Inspects aircraft in accordance with OEM Light or Heavy Maintenance manuals.

Evaluates removed components for serviceability and document discrepancies (squawks).

Troubleshoot and repair all airframe systems as required (hydraulics, landing gear, etc).

### **REQUIREMENTS**

A valid FAA approved Airframe and Powerplant (A&P) license.

An Associates Degree in Aviation or training in the form of military training, aeronautical academy or technical school

3-5 years of general aviation experience

Gulfstream, Hawker, Learjet, Citation, Falcon, Dassault, and FAR 143 Repair Station experience highly preferred.
