

AVIONICS TECHNICIAN

StandardAero is one of the largest independent MRO and aviation service businesses in the world, providing comprehensive services to commercial, military, business aviation, helicopters and industrial operators. Over 300 years of collective experience brings customers unique knowledge and expertise in solving maintenance challenges.

The company has over 3,700 employees working out of facilities strategically located in the U.S., Canada, Europe, Asia and Australia and serving customers from over 80 different countries.

The Avionics Technician troubleshoots and repairs avionics systems that are malfunctioning in customer aircraft, and installs avionics systems and components. Directly and openly communicates with customers regarding the status and time frame of repairs. Uses sound judgment and technical aptitude to make decisions regarding installation, troubleshooting, and discrepancy resolution. The Avionics Technician is technically competent and is expected to be able to accomplish most of his/her duties with minimal supervision. As customers are on site at the facilities, professional appearance and communication skills are required in order to create a positive and lasting professional relationship.

RESPONSIBILITIES

Troubleshoots and repairs Flight Management Systems, Satcom and Airborne Radio Telephone Systems, EGPWS/TAWS, communications, navigation, radar, TCAS/XPDR, DME, autopilot/flight director, audio, ADF, Cabin Management/In-flight Entertainment (IFE), and other sophisticated avionics/electronics systems.

Install avionics systems on customer aircraft.

Provide emergency power supply battery service for customer aircraft in-house.

Maintains continuous communication with customers regarding the status of avionics work on their aircraft.

REQUIREMENTS

Formal avionics systems and electronics education and training

FCC license.

A&P license preferred.

2-3 years experience in electronics and/or avionics within the aviation industry or military equivalent.
