Corporate Aircraft Maintenance Technicians

Since 1984 Thornton Aircraft Company has provided a variety of aviation services to Corporate, Aerospace, and Entertainment industries. Thornton Aircraft Company is an FAA authorized Part 145 Repair Station capable of Airframe Inspections, non-scheduled repairs, modifications and upgrades, engine work, as well as avionics inspection, fault isolation, and upgrades.

Thornton Aircraft Company is seeking qualified and current Corporate Aircraft Maintenance Technicians for full time employment opportunity which will provide excellent salary and benefits combined with a well-established, stable, and desirable working environment .

This position will focus on a variety of corporate jet aircraft including but not limited to Dassault/Falcon, Gulfstream, Bombardier Global/Challenger, Hawker and Cessna Citation.

Description:

Under minimal supervision, perform inspections, maintenance, and repairs of moderate to advanced complexity on aircraft systems and structures.

Essential Functions:

1. Communicate as required to receive and understand work assignments.
2. Perform complex aircraft inspections, pre and post flight checks, and confirmation / resolution of reported aircraft malfunctions.
3. Perform scheduled maintenance on aircraft systems and components in accordance with FAA regulations, manufactures recommendations, the company repair station manual as well as company policies and procedures.
4. Handle unscheduled maintenance and repairs of aircraft as needed.
5. Properly use and maintain company facilities and equipment ensuring accuracy and safety.
6. Ensure maintenance procedures and documents used are of current form and accurate.
7. Perform other duties as assigned by supervisor.

Required Qualifications:

- 3-5 Years of recent experience working on corporate aircraft models typical to the company.
- Valid Airframe and Powerplant (A&P) license issued by the FAA.
- Valid California Drivers License

Desired Qualities:

- Aircraft Manufactures recognized model specific training
- Local to Southern California
